PROFILE

I'm Indhu Ramar, a web developer in training skilled in HTML, CSS, Python, FastAPI, and SQL. I enjoy solving problems, creating clean user-friendly designs, and building efficient web applications. I like learning new technologies and aim to build simple yet useful solutions that improve user experience.

PROJECT

SwiftKart

- Developed a static e-commerce website showcasing mobile phones, earbuds, and watches.
- Implemented product sections, images, and navigation menus for seamless user experience.
- Focused on UI/UX design to make browsing and product viewing intuitive and attractive.
- **Technologies Used: HTML, CSS**

Here is my static project link

Safe Tracker

- SafeTracker is a web-based personal safety platform that helps users request immediate assistance during unsafe situations.
- The system shares the user's real-time location with nearby verified volunteers for quick support.
- The project aims to improve public safety by reducing fear and encouraging community-based help.
- **Technologies Used: HTML, CSS, SQL, Python fastAPI, JavaScript**

Here is my safeTracker project link
